With a consistency in presentation and an innovative set of learning aids, Corporate Finance, Canadian Edition, simultaneously meets the needs of both future financial managers and non-financial managers. This textbook truly shows every student how to “think finance.”

Valuation as the Unifying Framework
This book presents corporate finance as an application of a subset of simple, powerful ideas. The first is that valuation drives decision making—the firm should take projects for which the value of the benefits exceeds the value of the costs. The second is that in a competitive market, market prices (rather than individual preferences) determine values. The combination of these two ideas is what we call the Valuation Principle, and from it we establish all of the key ideas in corporate finance, including the NPV rule, security pricing, the relation between risk and return, and the tradeoffs associated with capital structure and payout policies.

Emphasis on Application
Applying the Valuation Principle provides skills to make the types of comparisons—among loan options, investments, and projects—that will turn students into knowledgeable, confident financial consumers and managers. When students see how to apply finance to their personal lives and future careers, they grasp that finance is more than abstract, mathematically based concepts.

Reinforcement of the Basic Tools
Chapter 3 briefly introduces the time value of money for single-period investments as a critical component of the Valuation Principle. Chapter 4 then focuses on the time value of money for cash flows lasting several periods. Finally, Chapter 5 demonstrates how interest rates are quoted and determined.

Table of Contents

Part I Introduction
Chapter 1 Corporate Finance and the Financial Manager
Chapter 2 Introduction to Financial Statement Analysis

Part 2 Interest Rates and Valuing Cash Flows
Chapter 3 The Valuation Principle: The Foundation of Financial Decision Making
Chapter 4 NPV and the Time Value of Money
Chapter 5 Interest Rates
Chapter 6 Bonds

Part 3 Valuation and the Firm
Chapter 7 Investment Decision Rules
Chapter 8 Fundamentals of Capital Budgeting
Chapter 9 Valuing Stocks

Part 4 Risk and Return
Chapter 10 Risk and Return in Capital Markets
Chapter 11 Systematic Risk and the Equity Risk Premium
Chapter 12 Determining the Cost of Capital

Part 5 Long-Term Financing
Chapter 13 Raising Equity Capital
Chapter 14 Debt Financing

Part 6 Capital Structure and Payout Policy
Chapter 15 Capital Structure
Chapter 16 Payout Policy
Focus on Capital Budgeting
The capital budgeting decision is one of the most important decisions in corporate finance. We emphasize it early in the textbook, by introducing the NPV rule in Chapter 3 to weigh the costs and benefits of a decision. This early introduction to capital budgeting allows us to present the idea of the cost of capital conceptually, which then motivates the risk and return coverage.

New Ideas
Fundamentals of Corporate Finance carefully balances the latest advancements in research and practice with thorough coverage of core finance topics. Innovations that distinguish this textbook include the following:
• Chapter 9 on stock valuation values a firm’s equity by considering its future dividends, free cash flows, or how its value compares to that of similar, publicly traded companies.
• Chapter 16 on payout policy examines the role of asymmetric information between managers and investors and how payout decisions may signal this information.
• Chapter 17 distinguishes between sustainable and value-increasing growth with a focus on determining whether “growth” will increase or decrease the value of the firm.

MyFinanceLab
• One Place for All of Your Courses. Users of the New Design can register, create, and access all of their courses from one convenient online location: pearsonmylab.com.
• An Enhanced Pearson eText. Available within the online course materials via an iPad app, the enhanced eText allows instructors and students to highlight, bookmark, and take notes.
• Advanced Communication Tools, including email, discussion board, chat, and ClassLive.
• More Customization Options, which provide additional ways to share documents, add content, and rename menu items.

Part 7 Financial Planning and Forecasting
Chapter 17 Financial Modeling and Pro Forma analysis
Chapter 18 Working Capital Management
Chapter 19 Short-Term Financial Planning

Part 8 Special Topics
Chapter 20 Option Applications and Corporate Finance
Chapter 21 Risk Management
Chapter 22 International Corporate Finance
Chapter 23 Leasing
Chapter 24 Mergers and Acquisitions

Chapter on the Web
Chapter 25 Corporate Governance

Study on the Go.
Featured at the end of each chapter, you will find a unique barcode providing access to Study on the Go, an unprecedented mobile integration between text and online content. Students link to Pearson’s unique Study on the Go content directly from their smartphones, allowing them to study whenever and wherever they wish!
