Is My Child OK?: When Behavior is a Problem, When It's Not, and When to Seek Help

By Paul, Henry A.

Dell, 2000. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: My kindergartner insists on wearing the same dress day after day. What should I do? My twelve-year-old is a target of the class bully. Should I intervene? My four-year-old is coming home with other kids' toys in his pocket. Should I be concerned? Is my child normal? Every parent has asked the question at one time or another. Now this wise and compassionate guide, written by an expert in children's mental health, offers reassuring words for worried parents—plus concrete ways to spot the difference between a normal stage of development and a true problem. In most cases, childhood problems will clear up with a healthy dose of common sense and loving parental attention. But sometimes professional help or medication is needed. This one-stop reference book—organized by symptom and covering everything from tantrums to learning disorders—tells parents what's "normal," what's not, how best to help your child through a rocky period, and when to get an expert's help. Discover: How much fighting between siblings is "normal" (page 94) What to do if your child is the class bully—or the victim of a bully (page 89) How to determine if...

Reviews

A top quality publication along with the font used was intriguing to read. I really could comprehend everything using this written e-book. It's been designed in an remarkably straightforward way and it is only after I finished reading through this publication by which basically altered me, modify the way I believe.

-- Cathrine Larkin Sr.

Very useful to all of group of people. I actually have read through and so I am certain that I will planning to study yet again once again down the road. I am just very easily can get a satisfaction of looking at a created book.

It is difficult to distinguish between stuttering and kids passing through a disfluency. Learn more about the differences and when you should seek help. When to Seek Help. Your child should be evaluated by a speech-language pathologist who specializes in stuttering if: You have a concern about your child’s speech. You notice tension, facial grimaces, or struggle behaviors during talking. Your child avoids situations in which he or she will have to talk. Your child expresses concerns about speech. When in doubt, seek out the help of a mental health professional who specializes in childhood disorders, as they can assist in properly assessing your child. If after seeking out professional help you find that your child does not qualify for a diagnosis, the mental health professional can help provide referrals to help with the issues that your child is having. For example, your child may have issues with controlling their temper, but they don’t qualify for an ODD diagnosis. Parents can still be provided with information on parenting groups or trainings that can assist with learning how to ha... There is not a single test alone that determine an ADHD diagnosis. Instead, it is an assessment of patterns of behavior.
