Back cover

'... a book of extraordinary power and integrity... Benny Morris takes that great tale of flight and conquest and tells it as it has never been told before: with precision and moral economy, with awesome detail and honesty, drawing from recently declassified archival and private papers.' Fouad Ajami in The Washington Post

‘In page after page crammed with hard data and play-by-play descriptions of what was going on in each period - December 1947 to March 1948, April to June 1948- ... Morris details the bloody conflict between Arabs and Jews and what was going on behind the lines. He takes us back, into offices of the Arab League and the Haganah, into the councils of the National Committees set up in Arab towns, into meetings of the Jewish Agency and, later, the fledgling Israeli government.' The Christian Science Monitor

‘This latest addition to the Cambridge Middle East Library is a book of exceptional importance It will be required reading for anyone who professes a serious interest in the Arab-Israeli Conflict over Palestine. Its conclusions, which invalidate many of the assumptions commonly made about the origins of the conflict, need to be taken into account in any attempt to devise a solution to it. Arab Affairs

‘This excellent myth-debunking book... deserves a wide readership among those who want to understand what has happened in Israel over the last 40 years rather than repeat discredited propaganda which serves only to prolong the war.' The Spectator
While Palestinian refugees are unique in some respects, the relative decline of exceptionalism opens new doors to understanding refugee policy in a troubled region.

The birth of the Palestinian refugee problem is traced from the 1947-9 exodus and the first Arab-Israeli war through Israel's decision to bar refugee repatriation and the subsequent fate of the abandoned Arab territories. A foundation for a realistic understanding of the ongoing Palestinian-Israeli conflict. Morris paints a vivid picture of the war that lead to Israel's birth as well as the Palestinian refuge problem. He has a bit of commentary but mostly saves his interpretations for his other book 1948 and After. Should be paired with "The Ethnic Cleansing of Palestine" by Ilan Pappe, to give differing "new Israeli historian" accounts of 1947-1949.
